Career Objective

Computer Science and Engineering student with a strong foundation in programming, problem-solving, and software development. Proficient in C, Java, and Python, with an interest in AI, Agentic AI, and emerging technologies. Eager to learn, innovate, and develop efficient solutions to real-world challenges.

Education

Lakireddy Bali Reddy College of Engineering 2023 – Present
B.Tech in Computer Science and Engineering *CGPA: 8.77/10*

Sri Chaitanya Junior College 2021 – 2023
Intermediate (MPC) *Percentage: 96.9%*

Rushi Vidyalayam 2021
Secondary School Certificate (SSC) *Percentage: 99.67%*

Technical Skills

Languages	:	C, Java, Python
Core CS	:	Data Structures and Algorithms, OOP, DBMS, Operating Systems
Databases	:	MySQL, Oracle, MongoDB
Web	:	HTML, CSS, JavaScript, Java Servlets, JSP, REST APIs
IoT / Embedded	:	ESP32, Raspberry Pi, Sensors, IoT Systems
Tools	:	Git, GitHub, VS Code, Eclipse, Apache Tomcat

Internships

Artificial Intelligence and Machine Learning Intern 2 Months / 120 Hours
SmartBridge Educational Services Pvt. Ltd. in collaboration with APSCHE

- Developed **OptiCrop**, a machine learning-based crop recommendation system using soil and environmental parameters.
- Performed data preprocessing and model development using **Python, NumPy, Pandas and Scikit-learn**.
- Developed a **Flask-based application** for providing crop recommendations based on user inputs.

Full Stack Developer Intern 2 Months
SmartBridge under APSCHE Virtual Internship Program

- Developed full-stack web application modules using frontend, backend and database technologies.
- Integrated **REST APIs and database services** for dynamic application workflows.
- Performed testing and debugging to improve application reliability.

Projects

Agentic AI-Based NOC Fault Diagnosis System *Python, FastAPI, LangGraph, PostgreSQL, OpenRouter*

- Developing an Agentic AI system for telecom network fault diagnosis, incident analysis, and service restoration recommendations.
- Designing multi-agent workflows using LangGraph for alarm correlation, root cause analysis, and anomaly detection.
- Building backend APIs with FastAPI and integrating PostgreSQL for incident and network event management.
- Integrating LLMs through OpenRouter and incorporating human-in-the-loop approval for proposed remediation actions.

Multimodal Robotic Vehicle Using Decision Fusion *ESP32, Python, MediaPipe, Vosk, Random Forest*

- Developed a robotic vehicle controlled through **head gestures and offline voice commands** using MediaPipe FaceMesh and Vosk.
- Implemented **confidence-based decision fusion** using Random Forest and voice matching scores, with an automatic safety stop for ambiguous commands.

AI-Powered Appointment Booking Agent *Python, n8n, Twilio, REST APIs*

- Developed an automated appointment booking agent that **calls customers and reminds them about upcoming appointments**.
- Integrated **Twilio** with n8n workflows to automate appointment confirmations, reminders and rescheduling.

Achievements

Project Expo – Engineers' Day, LBRCE: Presented the **Multimodal Robotic Vehicle Using Decision Fusion** during 3rd year.

Second Prize – Full Stack MERN Hackathon, LBRCE: Developed an online food booking application using React, Node.js and MongoDB.

Third Prize – Project Expo, PVP Siddhartha Institute of Technology: Presented the Smart Driver Safety and Accident Prevention System.

Certifications

AWS Certified Cloud Practitioner, AWS, 2025.

Salesforce Certified Agentforce Specialist, Salesforce, 2025.

The Joy of Computing Using Python (Elite), NPTEL, 2024.

Introduction to Internet of Things (Elite), NPTEL, 2024.

Leadership and Activities

Event Coordinator – KGF Event, Lakshya 2K25, LBRCE.

NSS Coordinator – Andhra Pradesh Legislative Assembly Elections 2024: Contributed to election awareness and volunteer coordination.
